

📌 SEASON SCENARIO: NINJA CLASH (FLAME AND SAND)

1. INTRODUCTION AND ATMOSPHERE

The Erangel map is split in two by a mysterious natural phenomenon. Half of the map is engulfed in a golden-orange dawn, where the Village of Flame rises, while the other half descends into a crimson dusk, dominated by swirling sandstorms and the emergence of the Village of Sand. **Lobby Screen:** A massive pillar of energy pierces the sky at the center. On the right, Naruto's Kurama (Nine-Tailed) form, and on the left, Gaara's Shukaku form roar at each other incessantly. Players stand in the neutral zone between these two titans, wearing the gear of their chosen village.

2. SELECTION AND SQUAD STRUCTURE

Village Loyalty: Players choose either the Village of Flame or the Village of Sand at the start of the season. Squads can only be formed by members of the same village. **The Choice of Fate:** As the match begins, the system randomly selects one player from each squad to be the "Jinchūriki" (Vessel). A silhouette of either Naruto or Gaara appears over this player.

3. GAMEPLAY MECHANICS

Transformation: Once the "Jinchūriki" reaches a "Chakra Seal" location on the map, they transform into their massive beast form. **Special Abilities:**

- **Flame (Naruto):** Uses Shadow Clones to confuse enemies and Rasengan to destroy vehicles in a single strike.
- **Sand (Gaara):** Uses Sand Shield to absorb incoming bullets and the Sand Eye to see enemies inside buildings (X-Ray effect). **Collision Effect:** When a Rasengan and a Sand Wall collide, a massive "Energy Explosion" occurs in a wide radius; both sides have their armor shattered and HP reduced. This adds a layer of tactical risk management.

4. LOOT AND ECONOMY (CHAKRA SYSTEM)

Chakra Crystals: The leaders (Naruto or Gaara) of the winning squad collect "Yellow Chakra" (Flame) or "Red Chakra" (Sand) as loot. **Deadly Cargo:** These crystals are visible on the player's backpack. If the carrier dies, the crystal drops to the ground, allowing the enemy to steal it. This turns the final circle into a high-stakes "capture the flag" experience. **Reward Market:** Collected crystals are used in the "End-of-Season Chakra Market."

- **Yellow Chakra Shop:** Rasengan-themed weapon skins and special capes.
- **Red Chakra Shop:** Sand Shield-themed helmet/backpack skins and sandstorm movement trails.

5. END-OF-SEASON FINALE: "THE GREAT CLASH"

In the final week of the season, a "Battleground" opens at the very center of the map. All players worldwide contribute to their village's total crystal count to determine the winner. **Final Scene:** At the end of the season, the lobby screen shows the winning beast (either Naruto or Gaara) overpowering the defeated side, showering the sky with a beacon of victory.

6. PLAYER PSYCHOLOGY AND BALANCE

Why the Choice is Difficult: Because the rewards for Yellow Chakra and Red Chakra are completely different. If a player wants both the Naruto skins and the Gaara effects, they must master both sides during the season. **Social Interaction:** The massive lobby animation encourages pre-match strategy talk, such as "Where should we deploy our clones?" or "When should we activate the wall?"
